(54) PACKAGING CONTAINER

(57)Abstract:

PURPOSE: To provide a container which is strong during usage, but can be easily crushed after the usage by a method wherein on the peripheral wall of the container, spiral or zig-zag form pleats 10 are provided, and at the same time, the container is shrink-packaged with a shrinkable packaging material with a perforation.

CONSTITUTION: Spiral or zig-zag form pleats 10 are formed in the peripheral wall of a packaging container 1. Then, the periphery of the packaging container 1 is roughly wrapped with a cylindrical heat-shrinkable film 20, and the film 20 is heated, made to shrink, and joined to the peripheral wall of the packaging container 1. On the heat-shrinkable film 20, two lines of perforations 21 are provided in the longitudinal direction, and the heat-shrinkable film 20 can be removed from the packaging container 1 by tearing off an area 22 which is located between the perforations 21. As the result, the packaging container 1 can be easily deformed by an external force, and can be crushed in the longitudinal direction.

(54) 【発明の名称】 包装用容器

(57) 【要約】

【目的】 使用中は強固だが、使用後は容易に押し潰すことのできる包装用容器を実現する。

【構成】 包装用容器1の周側に螺旋状又は蛇腹状の皺部10を設けると共に、周側を収縮包装材20により収縮包装し、更にこの収縮包装材には包装材の離脱手段21を設ける。
